TECHNICAL SKILLS

– Creating websites and web applications using HTML5, CSS, & JS

– Object-oriented programming experience in C++, C, & Java

– Knowledge of Git, Unix, LaTeX, Python, & Ruby

PROJECTS

Personal Website   2014

– Spent several months making and modifying a personal website using HTML, CSS, & JS

– Implemented AJAX to achieve asynchronously loaded tab content

Drink / Cup   2014

– Created a simple interactive web application with HTML, CSS, & JS, which presents the user with the challenge of drinking every colour imaginable

– Drew inspiration from a Stack Overflow page that gave an example of image masking in animation

New Day, New Feed   2015

– A static web application that lets users clean up their Twitter feeds with style

– Built using HTML, CSS, JS, & AngularJS

VOLUNTEER EXPERIENCE

Coaching Assistant   2013
KW Gymnastics Club

– Assisted with over 80 hours' worth of in-gym supervising and spotting of gymnasts as they performed routines and learned acrobatic exercises

– Worked with other staff to keep gymnasts engaged by organizing events and games during the gym's weekly, 5-day summer camp programs

Peer Tutor   2012 – 2014
Forest Heights Collegiate Institute

– Gained 30+ hours of tutoring experience through a program aimed at assisting students in grades 9 through 12 with their academic performance in various courses

ACHIEVEMENTS

Governor General's Bronze Academic Medal   2014
Forest Heights Collegiate Institute

– Awarded for obtaining the highest average upon graduating from high school

Published Writer   2014
Polar Expressions Publishing

– Had a short story published in a collection entitled "Let There Be Dragons"

HOBBIES & INTERESTS

– Blogging and Project Euler

– Annotating and editing on Genius.com

– Doing quantitative and opinion-based research on music artists and record charts
