TECHNICAL SKILLS

– Creating websites and web applications using HTML, CSS, JS, Django, & Rails

– Object-oriented programming experience in Java, C++, & C

– Knowledge of Python, Ruby, Git, Heroku, LaTeX, & Unix

PROJECTS

Blogging Platform   2015

– Built a personal blogging application from scratch using Django for the back end

– Used HTML, CSS, & JS for the view-specific, bootstrapped templates

New Day, New Feed   2015

– A static web application that lets users clean up their Twitter feeds with style

– Built using HTML, CSS, JS, & AngularJS

Personal Website   2014

– Spent several months making and modifying a personal website using HTML, CSS, & JS

– Implemented AJAX to achieve asynchronously loaded page content

Drink / Cup   2014

– A simple, static web application made with HTML, CSS, & JS

– Drew inspiration from a Stack Overflow page that detailed image masking in animation

Protect Your Head   2014

– A Java side-scroller written in Eclipse and based on object avoidance

VOLUNTEER EXPERIENCE

Coaching Assistant   2013
KW Gymnastics Club

– Assisted with over 80 hours' worth of in-gym supervising and spotting of gymnasts as they performed routines and learned acrobatic exercises during the gym's weekly, 5-day summer camp programs

ACHIEVEMENTS

Governor General's Bronze Academic Medal   2014
Forest Heights Collegiate Institute

– Awarded for obtaining the highest average upon graduating from high school

Published Writer   2014
Polar Expressions Publishing

– Had a short story published in a collection entitled "Let There Be Dragons"

HOBBIES & INTERESTS

– Blogging and Project Euler

– Annotating and editing on Genius.com

– Doing quantitative and opinion-based research on music artists and record charts
